

## UNITED STATES PATENT AND TRADEMARK OFFICE

UNITED STATES DEPARTMENT OF COMMERCE  
United States Patent and Trademark Office  
Address: COMMISSIONER FOR PATENTS  
P.O. Box 1450  
Alexandria, Virginia 22313-1450  
[www.uspto.gov](http://www.uspto.gov)

APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
09/691,553	10/18/2000	Michael G. Coutts	8573.00	3877
26889	7590	09/02/2008	EXAMINER	
MICHAEL CHAN			PATEL, HARESH N	
NCR CORPORATION			ART UNIT	PAPER NUMBER
1700 SOUTH PATTERSON BLVD				
DAYTON, OH 45479-0001			2154	
MAIL DATE		DELIVERY MODE		
09/02/2008		PAPER		

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 09/691,553	<b>Applicant(s)</b> COUTTS ET AL.
	<b>Examiner</b> HARESH N. PATEL	<b>Art Unit</b> 2154

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(o).

#### Status

1) Responsive to communication(s) filed on 16 June 2008.  
 2a) This action is FINAL.      2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

4) Claim(s) 39-47 is/are pending in the application.  
 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
 5) Claim(s) \_\_\_\_\_ is/are allowed.  
 6) Claim(s) 39-47 is/are rejected.  
 7) Claim(s) \_\_\_\_\_ is/are objected to.  
 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

9) The specification is objected to by the Examiner.  
 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
 a) All    b) Some \* c) None of:  
 1. Certified copies of the priority documents have been received.  
 2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

1) Notice of References Cited (PTO-892)  
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)  
 3) Information Disclosure Statement(s) (PTO/SB/08)  
 Paper No.(s)/Mail Date \_\_\_\_\_

4) Interview Summary (PTO-413)  
 Paper No(s)/Mail Date \_\_\_\_\_  
 5) Notice of Informal Patent Application  
 6) Other: \_\_\_\_\_

## **DETAILED ACTION**

1. Claims 39-47 are subject to examination. Claims 1-38 are cancelled.

### ***Response to Arguments***

2. Applicant's arguments dated 6/16/2008 (i.e., web browser 36 in Figure 2 gains access to the Internet 16, to thereby reach the server 12, etc.) are persuasive and therefore, the finality of office action dated 10/19/2007 is withdrawn and the prosecution is hereby reopened. However, upon further consideration of the available prior arts, the claimed subject matter is rejected with the new grounds of rejection.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Note: The following rejections are presented considering the applicant's statements dated 6/16/2008, i.e., web browser 36 in Figure 2 gains access to the Internet 16, to thereby reach the server 12, etc.

4. Claims 39-47 are rejected under 35 U.S.C. 102(e) as being anticipated by Barcelou et al., Transactions Holdings Limited, 6,945,457 (Hereinafter Barcelou).

5. Referring to claims 39, Barcelou discloses a method of operating a self-service terminal having a number of peripheral devices and a terminal application which controls the peripheral devices (e.g., usage of well-known Automated teller machine with internet support including web browser application, col., 3, lines 2 – 48), the method comprising the steps of:

presenting to a self-service terminal user an option of accessing a remote third party application to obtain a service from the third party application while the user is at the self-service terminal (e.g., internet information access application, col., 3, lines 2 – 48); receiving a request from the third party application to use one of the peripheral devices of the self-service terminal in response to the user accessing the third party application to obtain the service from the third party application (e.g., access application support user request, col., 4, lines 8 – 51); using the terminal application to determine if the request received from the third party application should be granted (e.g., whether user request be granted or not, col., 4, lines 8 - 51); and if so activating the peripheral device under control of the terminal application such that control of the peripheral device is not passed to the third party application when the request from the third party application to use the peripheral device is granted, and thereby to allow the user to obtain the service via the peripheral device (e.g., user accessing internet service using the ATM device, col., 4, lines 8 - 51).

6. Referring to claim 40, Barcelou discloses the claimed limitations as rejected above.

Barcelou also discloses monitoring terminal usage during operation of the third party application to ensure that the user is still present (e.g., col., 4, lines 8 - 51).

7. Referring to claim 41, Barcelou discloses the claimed limitations as rejected above.

Barcelou also discloses sending a response to the third party application to indicate the status of the request received from the third party application (e.g., col., 5, lines 11 - 51).

8. Referring to claim 42, Barcelou discloses a self-service terminal comprising: a peripheral device; a terminal application which controls the peripheral devices; and a controller (e.g., col., 3, lines 2 – 48), for (i) receiving a request from a remote third party application to use the peripheral device in response to the user accessing the third party application to obtain a service from the third party application while the user is at the self-service terminal (e.g., col., 3, lines 2 – 48), (ii) using the terminal application to determine if the request received from the third party application should be granted (e.g., col., 4, lines 8 - 51); and (iii) activating the selected peripheral device under control of the terminal application such that control of the peripheral device is not passed to the third party application at any time (e.g., col., 4, lines 8 - 51).

9. Referring to claim 43, Barcelou discloses the claimed limitations as rejected above.

Barcelou also discloses wherein the peripheral device includes a user input device (e.g., col., 3, lines 2 – 48).

10. Referring to claim 44, Barcelou discloses the claimed limitations as rejected above.

Barcelou also discloses wherein the peripheral device includes a display device (e.g., col., 3, lines 2 – 48).

11. Referring to claim 45, Barcelou discloses a self-service terminal comprising: a cash dispenser for dispensing cash to a self-service terminal user conducting a self-service cash dispensing transaction (e.g., col., 3, lines 2 – 48); a peripheral device for presenting information to the user; a memory storing a terminal application which controls the peripheral device; and a processor (e.g., col., 3, lines 2 – 48) for (i) receiving a request from a remote third party application which is different from the terminal application to use the peripheral device to present third party information to the user (e.g., col., 3, lines 2 – 48), (ii) determining if the request from the third party application should be fulfilled (e.g., col., 4, lines 8 - 51) and (iii) if so, using the peripheral device under control of the terminal application such that control of the peripheral device is not passed to the third party application at any time to present the user with the third party information and thereby to fulfill the request (e.g., col., 4, lines 8 - 51).

12. Referring to claim 46, Barcelou discloses the claimed limitations as rejected above.

Barcelou also discloses wherein the peripheral device includes a display device (e.g., col., 3, lines 2 – 48).

13. Referring to claim 47, Barcelou discloses the claimed limitations as rejected above.

Barcelou also discloses wherein the peripheral device includes a display device (e.g., col., 3, lines 2 – 48).

14. Claims 39-47 are rejected under 35 U.S.C. 102(e) as being anticipated by Drummond et al., 6,598,023 (Hereinafter Drummond-Diebold).

15. Referring to claims 39, Dummond discloses a method of operating a self-service terminal having a number of peripheral devices and a terminal application which controls the peripheral devices (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14) the method comprising the steps of:

presenting to a self-service terminal user an option of accessing a remote third party application to obtain a service from the third party application while the user is at the self-service terminal (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14); receiving a request from the third party application to use one of the peripheral devices of the self-service terminal in response to the user accessing the third party application to obtain the service from the third party application (e.g., col., 7, lines 8 – col., 64); using the terminal application to determine if the request received from the third party application should be granted (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14); and if so activating the peripheral device under control of the terminal application such that control of the peripheral device is not passed to the third party application when the request from the third party application to use the peripheral device is

granted, and thereby to allow the user to obtain the service via the peripheral device (e.g., col., 14, lines 38 – col., 15, line 46).

16. Referring to claim 40, Dummond discloses the claimed limitations as rejected above.

Dummond also discloses monitoring terminal usage during operation of the third party application to ensure that the user is still present (e.g., col., 14, lines 38 – col., 15, line 46).

17. Referring to claim 41, Dummond discloses the claimed limitations as rejected above.

Dummond also discloses sending a response to the third party application to indicate the status of the request received from the third party application (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14).

18. Referring to claim 42, Dummond discloses a self-service terminal comprising: a peripheral device; a terminal application which controls the peripheral devices; and a controller (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14) for (i) receiving a request from a remote third party application to use the peripheral device in response to the user accessing the third party application to obtain a service from the third party application while the user is at the self-service terminal, (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14) (ii) using the terminal application to determine if the request received from the third party application should be granted, (e.g., col., 7, lines 8 – col., 64); and (iii) activating the selected peripheral device under control of the terminal application such that control of the peripheral device is not passed to the third party application at any time (e.g., col., 14, lines 38 – col., 15, line 46).

19. Referring to claim 43, Dummond discloses the claimed limitations as rejected above.

Dummond also discloses wherein the peripheral device includes a user input device (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14).

20. Referring to claim 44, Dummond discloses the claimed limitations as rejected above.

Dummond also discloses wherein the peripheral device includes a display device (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14).

21. Referring to claim 45, Dummond discloses a self-service terminal comprising: a cash dispenser for dispensing cash to a self-service terminal user conducting a self-service cash dispensing transaction (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14); a peripheral device for presenting information to the user; a memory storing a terminal application which controls the peripheral device; and a processor (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14) for (i) receiving a request from a remote third party application which is different from the terminal application to use the peripheral device to present third party information to the user, (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14)(ii) determining if the request from the third party application should be fulfilled, (e.g., col., 7, lines 8 – col., 64); and (iii) if so, using the peripheral device under control of the terminal application such that control of the peripheral device is not passed to the third party application at any time to present the user with the third party information and thereby to fulfill the request (e.g., col., 14, lines 38 – col., 15, line 46).

22. Referring to claim 46, Dummond discloses the claimed limitations as rejected above. Dummond also discloses wherein the peripheral device includes a display device (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14).

23. Referring to claim 47, Dummond discloses the claimed limitations as rejected above. Dummond also discloses wherein the peripheral device includes a display device (e.g., col., 2, lines 19 – col., 59, col., 4, line 60 – col., 5, line 14).

### ***Conclusion***

The claims contain “if” conditional statements regarding the limitations. In order to expedite the prosecution of this case, multiple references are used for the rejections to demonstrate that several references disclose the claimed subject matter of the claims. Examiner has cited particular columns and line numbers and/or paragraphs and/or sections and/or page numbers in the reference(s) as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety, as potentially teaching, all or part of the claimed invention, as well as the context of the passage, as taught by the prior art or disclosed by the Examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Haresh Patel whose telephone number is (571) 272-3973. The

Art Unit: 2154

examiner can normally be reached on Monday, Tuesday, Thursday and Friday from 10:00 am to 8:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn, can be reached at (571) 272-1915. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
